Index

Academic City, 116
Academy of Sciences, 52, 172, 316, 450, 464, 504; planning functions of, 44-46; structure of, 34-35
Administrations, *see* Chief administration
Administrative methods, 304, 314, 380, 391, 529; in quality certification, 348-349; *see also* Economic methods
Adopters, first, 296, 525; discouraged by temporary prices, 283; incur high costs, 262
Adoption of new technology, 201, 350; encouraged by promotional selling, 218-224; resistance to, 215-218; *see also* Diffusion
Advertising, 209, 225
Allocation (*fond*), 210; centers (*fondoderzhateli*), 66, 68-69, 210, 226; certificate (*nariad*), 66, 74, 88; orders (*nariady*) and sales problems, 211-212, 214-215, 220, 225-226, 231
Analogue product, 307, 319-320; rule for choosing, 469; *see also* Pricing, analogue
Anisimov, G. D., 192, 258
Antonov, O., 126
Association council, 143; *see also* Directors' council
Associations: older types of, 129-130; production and industrial, 31, 142-143; *see also* Corporations; Production association
Assortment plan, 409
Autonomy of enterprise, 523-526

Bank, *see* Construction Bank; State Bank
Bankruptcy statute, 531-532
Becker, A., 290
Bergson, A., 5, 503, 514
Birman, A. M., 144, 411, 419, 531, 436
Black market, 536
Bol'shevik enterprise experiment, 226-227, 390
Bonus, 138, 146, 176, 182, 213, 310, 314; for assistance in introducing inventions, 462-463; end-of-year, 431; from Enterprise Fund, 407; for exports, 463-464; from Innovation Bonus Fund, 455-457; for innovation start-up, 459-460; for inventions and improvements, 461-462; for R&D organizations, 128; for special achievements, 431
Bonus, basic: from Bonus Fund (after 1965), 431-432; and cost-reduction target, 426-428; as dominant incentive, 403-405; and New Technology Plan fulfillment, 458; before 1965 Reform, 405-406
Bonus Fund, 428-432; 478-485, 494; distribution of, to individuals, 497-500; innovation supplements to, 423-424, 460-461
Bonus Fund, Innovation, 450-457, 479-484; calculation of economic benefit in, 453-456; 494; distribution of, to individuals, 498-499; encourages small-scale innovations, 469-470; limits on bonuses from, 456-457; origins of, 451-453
Bonuses: incentive value of, 477; limits on size of, 457, 463-464, 484-487; managerial, relative to workers', 498-499; maximization of, qualified, 404-405; under Saratov system, 111; and short time horizon, 419; size of, 478-484
Boretsky, M., 269
Branch administration, *see* Chief administration
Break-in period, 199-200; declining cost during, 264-265; long duration of, 268; of production start-up, 263-264
Brezhnev, L. I., 503
Bright, A. A., 533
Brown, E. C., 161
Brozen, Y., 98
Budget financing, 114, 177, 192
Bureau of Innovations and Inventions (BRIZ), 33, 110, 461-462, 487
Bureaucratization, 10, 12
Business accounting (*khozraschet*), 114, 181, 242
Business schools, 519

Buyer's market, 210

Campaigns, 143, 229, 508
Campbell, R. W., 511, 517-518
Capital charge, 176, 178, 186, 192, 241, 433; in calculation of economic benefit, 465; determines profit markup, 243; discourages in-house R&D, 107; stimulates selling, 215
Capital, working, 191, 199, 201
Carter, C. F., 21, 62, 109, 141, 468
Central Statistical Administration, 252, 362, 284, 466
Centralization, 238; in supply planning, 81-85; *see also* Decentralization
Certificate of Invention, 288, 329, 450, 464
Chamber of Commerce, All-Union, 36
Chief administration (*glavk*): branch and functional, 37-38; relation to corporations, 37, 131, 133-134, 136-137, 142
Chief sales administration (*glavsbyt*), 210
Chief supply administration (*glavsnab*), 68, 83, 210
Classical period (1930-1965), 405
Combine (*kombinat*), 129
Command economy, 18, 55, 401
Commercial secrecy, 510
Commodity controls, 63-66, 210
Communist Party, 51, 352, 520; Central Committee of, 34, 41, 199; organizes mass participation, 109; Politburo of, 34, 38, 47; promotes innovation, 40-41; quality inspections by, 248
Comparable output, 420, 425
Competition, 120-129; in aircraft design, 126; in architectural design, 126; and enterprise autonomy, 527-528; of foreign products, 516; military industry faces, 508; socialist, 120-121, 432, 486, 526-527
Conditional bonus indicators, 405-406
Conglomerate mergers, 136
Construction: engineering organization, 40, 219; period, duration of, 264; supply administration (*soiuzglavkomplekt*), 67-68; uncompleted, 189
Construction Bank, 35, 175, 177-180, 184, 518
Construction industry, 76, 264, 388 n83
Consumer goods: experiments to improve, 226-227; pricing of, 343; sales problems of, 214-215
Consumer goods, low priority of, 196-197, 509-531; retards innovation, 197, 509-510
Contracts, for R&D services, 53, 113-120, 173
Control by the ruble, 181, 188
Control figures, 15, 42, 44
Controlled commodity list, 64
Corporation, research-based, 132-135, 145-147
Corporations, 31-32, 129-147, 525-526; campaign to form, 229; legitimize enterprise "autarky," 525-526; 1937 Resolution on, 31-32, 130-132, 140-147; 1974 statute on, 142-147; organizational structure of, 133-135, 142-147; problems of, 135-140; 144-147; types of, 130-132, 142-143; *see also* Associations
Cost: average unit, 240-241, 257; branch average, 241-242, 303; declines during start-up, 264-269; direct, 241; eliminated as plan indicator (1965), 257, 356; estimation of, 281, 294; leaders' and followers', 261-263; learning, 262; misrepresentation of, 281-282, 289, 374; of output, full, 257; overruns, 259-260; planned and realized, 258-261; social, 272, 467-468
Cost-plus-profit pricing, 240-244; subsidies as departure from, 267-271
Cost-reduction target, 257-258, 410-411; changed definition of, 425-426; determines basic bonus, 426-428; effects of, on innovation, 356, 358 n10, 421; method of calculating, 420; shortens time horizon, 420-421
Cost rule, 410-412; and process innovation, 415-416; and product innovation, 425-426; and quality deterioration, 418
Costs, start-up, 263-264; capitalization of, 270; inflation of, deliberate, 270; in parametric pricing, 326-327; subsidized, 269
Council of Innovators, 109-110
Council of Ministers, 41, 51-52; Presidium of, 34, 38, 47
Craftsmanship, sense of, 505
Credits: by Construction Bank, 176-180; by State Bank, 175, 183, 190-196
Culturological explanation, 519
Customers: attitude of, to high prices, 387-388, 391; as price controllers, 384-389

Data, sources of, 22
Decentralization, 81-82, 238, 519; creeping, 18; of price administration proposed, 390-393; *see also* Centralization

Decision rules, 400-403; consequences of, for innovation, 413-419, 437-445; distinguished from incentives, 11, 401-403; as fundamental property of economic system, 9-10; induce short time horizon, 297-298; operating and formal, 402, 413, 439, 449, 468-471
Decision rules, classical: cost rule, 410-411; output rule, 409; product-mix rule, 409-410; profit rule, 411-413; ratchet rule, 408-409; target rule, 408
Decision rules, since 1965 Reform: innovation rules, 435; labor-productivity rule, 434-435; profit rule, 432-434; ratchet rule, 435-437; sales-revenue rule, 434; target rule, 435-437
Demand, excess, 89, 211-212, 215-216; *see also* Seller's market
Demand, influence of: on pricing, 316-318; on product design, 217, 328; on product mix, 345
Department of Comprehensive Planning of the Introduction of New Technology into the National Economy (of State Planning Committee), 35
Depreciation, 176-178, 184, 241, 433
Design: influence of user requirements on, 217; technical virtuosity in, 233 n217, 353, 385
Diffusion, 200, 209, 223, 344-345, 350; *see also* Adoption of new technology
Directors' council, 133, 137-140, 143; *see also* Association council
Director's Fund, 182; *see also* Enterprise Fund
Discounts, price, 342, 350-352
Disequilibrium, 62, 92, 210; and supply problem, 62-63; 89-90; *see also* Demand, excess
Distribution plan, 65
Dymshits, V. E., 90

Economic benefit (*effektivnost'*): formulas, as rules of choice, 464; ignored in early innovation bonuses, 450-453; inaccuracies in calculation of, 495; neglected in cost-based pricing, 304; in New Technology Plan, 458-459; in R&D, 118, 330; and scale of output, 466-467
Economic benefit, in bonus calculations: in bonuses for inventions and improvements, 461-462; in Innovation Bonus Fund, 451-457; problems of calculation of, 464-467
Economic benefit, in pricing products: in analogue pricing, 308-310; in optimal price, 315-316; in pricing original products, 330-311; in product-improvement pricing, 343, 348, 350; in upper-limit price, 311-313
Economic effectiveness, *see* Economic benefit
Economic growth, ix-x, 478; contribution of foreign technology to, 513-514
Economic methods, 348, 380, 391, 348; *see also* Administrative methods
Economic Reform (1965), 177, 428-445; consequences of, for innovation, 437-445; cost-reduction indicator eliminated by, 257, 260; decision rules since, 432-437; financing break-in costs since, 201; Production Development Fund introduced by, 182-190; role of selling enhanced by, 215, 224; and supply system, 80-89
Economic rents, 421, 444, 445 n5, 485; hostility toward, 247, 322, 388
Economic structure: defined, 5-8; fundamental properties of, 8-14; interdependence among properties of, 125-126, 146, 166, 230, 238-239, 389, 475, 492; other meanings of, 24 n8
Economic systems compared with respect to: autonomy over organizational structure, 141-143; competition, role of, 120-123, 127-128; consumer goods, innovation of, 197; contracts, role of, 119-120; cost-behavior of new products, 265, 295-298; cost calculation methods, 240-241; cost overruns, 259-260; decision making, locus of, 14; decision rules, 399-400; economic calculation, precision of, 468; entry and exit, conditions of, 530-533; finance, role of, 171; incentives for innovation, 498-500, 436, 498-500; individual inventors, role of, 108-111; innovation by "invasion," 222-224; interenterprise transactions, 129; invisible foot, 528-530; labor market, 155; managerial incomes, 476; marketing and advertising, 218-220; maximization of income, 404-405; mission-oriented technology, 506-508; modes of economic government, 237-238; multiplant corporations, 140; new products and economic success, 277; optimal number of models, 198; organizational structures, origin of, 98-99; price behavior of new products, 495-498; price and quality controls, 247; pricing methods, 238-239, 327-328, 364-366; product differentiation, 378-380;

Economic Systems (continued)
product and process innovation, relative importance of, 418-419; quality of products 355; R&D, product and process, 221-222; resistance to innovation, 216-218; risk, role of, 521; social costs and benefits, 468-469; structural properties of economic system, 8-9, 19; supply and demand on innovation decision, effect of, 185, 195-196, 209; technological bias, 353-354; technological knowledge, dissemination of, 99, 510-513; technological knowledge, pricing of, 173; theory of firm, role of, 14; time horizon, duration of, 422-423; unemployment, technological, 163
Efficiency, 125, 379; in investment choice, 306; in price setting, 303, 322; of resource allocation, viii, 209, 243
Employment agencies: abolished, 155, 164; restored, 157, 164, 169
Engineering-design organization, 39-40, 45-46
Enos, J., 54
Enterprise: as focus of study, 14-20; influence of, on innovation, 15-17, 45, 53-58; innovation commission, 45; internal organization of, 31-33, 53; "normally operating," 241-242; quantitative analysis of, 21-22
Enterprise Fund, 182-184, 185-196, 406-407, 497; abolished in Reform (1965), 183, 428; process innovation encouraged by, 195-196; as profit incentive, 412; supplemented for new products, 424
Enterprise planning: general, 42-43; of innovation, 43-48
Enterprises: number of, 17, 36, 57-58; size distribution of, 33-34; *see also* New enterprises
Entry, ease of, 532-534
Equity rule, 314-316
Expediter, 72, 370

Federenko, N. P., 90
Financial resources, 171-204; for centralized capital investment, 175-181; for decentralized capital investment, 181-195; importance of, to enterprise, 171; special needs for, by innovators, 171-172
Financing Scientific Research, Special Fund for, 172-174
Firm (*firma*), 3, 34, 130, 151 n99
Firm, theory of, 14-15
Foreign technology, 414; borrowing of, 513-518; imports in 1930s, 196; limited knowledge of, 349
Formalism, 143, 146, 202, 349
Free balance (of profit), 176, 178-180
Funded commodities, 66-67, 69

Gasoline supply experiment, 90-91
Gatovsky, L. M., 112
Gofman, K., 317
Goldman, M. I., 467
Granick, D., 13, 17, 269, 414, 422, 476
Gray market, 527
Gross output target, 340, 445 n16; as basis of bonus, 405-406, 409; dropped as bonus indicator, 427
Grossman, G., 18, 352
Growth rate, x, 113, 513-514
Gusarov, A. S., 289, 364, 369

Hedonic price index, 308, 311, 325
Hero of Socialist Labor, 450
Hershey, R. L., 422
Higher educational institutions: applied research in, 39, 59 n22; measures to improve, 111
Hoarding: of labor, 165-168; of supplies, 91
Honoraria, for inventors, 35
Honored Republic Inventor, 450
Horizontal integration, 129

Import substitution, 451
Improvements: bonuses for, 461; defined, 473 n40; pricing of, 339-358; *see also* Product improvements
Incentive Funds, 428-432
Incentives: administration of, 493-500; after 1965 Reform, 428-445; before 1965 Reform, 423-428; classical system of, 405-423; decision rules, relation to, 11, 401-402; general, 399-445; ignore risk, 522; and innovation, 475-493; nonmonetary, 401-402, 450; relationship of, to performance, 495-497; special, 449-471; structure of, 10-11; *see also* Bonuses
Income distribution, equity of, 453, 537; related to size of bonuses, 478, 485; Soviet principle of, 491-492
Incomes of management, 475-493; bonuses as share of, 478-484; from innovation and non-innovation, 487-489; limits on, 484-487, 535; salary, as share of, 475-478

Industry, as focus of study, 2
Inflation, 320
Informal behavior, 167, 373
Innovation: advances careers, 477, 505; "advocacy" of, 223-224; bunching of, 417, 420, 442, 458; and capital investment, 175; capital-saving, 168, 442-443; defined, 3-4; first to introduce, 262; by "invasion," 222-223, 534; labor-saving, 160-161, 167-168; and labor supply, 156-169; lead times, 102, 203, 264, 268, 459; by order, 504-505; and organizational autonomy, 141-142; output declines during, 413-415; planning of, 43-47; rate of, defined, 4-5; resistance to, 3, 372-373, 524; rewards for, relative to noninnovation, 487-489, 521; rules, 435; social, 23 n1; stages of, 103-104, 107; unsuccessful, costs of borne by state, 536; user requirements ignored in, 217; *see also* Bonus Fund, Innovation
Innovation associations, 132
Innovation decision, influence on: of credit-financed investment, 178-179, 195; of economic structure, 7-8; of financial resources, 171; of New Products Fund, 203-204; of operating rules, 402; of other enterprise decisions, 29; of price administration, 368-373; of Production Development Fund, 186-190; of profit, 296, 426; of technological bias, 355-356
Innovation, pressure for; by Party, 41; quality of innovation declines because of, 378-379; spurious innovation stimulated by, 378
Innovation, process, 4, 183, 195, 198, 418; under classical rules, 415-419; cost targets encourage, 258; declining cost in, 270-271; emphasized over product innovation, 204; under Reform rules (1965), 441-443; *see also* New processes
Innovation, product, 4, 183, 198; under classical rules, 413-415; financing of, 195-204; increases costs, 258; less frequent than process innovation, 204; low profit rates discourage, 250; neglected in 1930s, 195-198; under Reform rules (1965), 438-441; and time horizon, 297; *see also* New products
Innovation, small-scale, 53-54; classical rules encouraged, 416; economic value of, 54, 339; excessive rewards for, 339; profit-rate ceiling encourages, 350
Innovation, sources of: borrowed foreign technology, 513-518, innovation by order, 504-505; priority sectors, 505-510; scientific and technical manpower, 503-504, socialization of knowledge, 510-513
Innovation, spurious, 334, 375-380, 418, 573; increases administrative burden, 379; sales-revenue rule discourages, 441; temporary prices stimulated, 377
Innovations: as ideas, 97; number of, as measure of innovativeness, 457-459; postponed until new plan period, 420; productivity of, ignored in pricing, 302-305
Innovations, initiation of: in enterprises, 53-55, 201; in government agencies, 48-50; in ministries, 50-52; in R&D organizations, 52-53
Innovative effort, income elasticity of, 490, 492-493, 535-538
Institute for Scientific and Technical Information, 510
Interest: and capital charge, 243; and cost calculations, 241; on investment credits, 178-180; on State Bank credits, 191-193, 212
Interest groups, 78
Inventions, 328, 333; rewards for, 450-451, 461, 463
Inventories, 90-92, 213-215
Inventors, individual, 108-111
Investment: centralized, 175-181; choice, debate over, 452, 454; decentralized, 181-195

Marginalism, reverse, 214-242
Market: research 224; socialism, 290; structure, in capitalism, 8-9, 19
Market-clearing rule, 316-319
Marketing: and "direct selling," 228; distinguished from distribution, 218; by enterprise, 224-226; and innovation, 209; *see also* Sales; Selling
Marshall, A. W., 259
Marxism, 240, 249, 290, 301, 303, 314, 352, 357, 522-523
Mass participation, 109-111
Material balances, 42, 59 n35, 65, 70, 82
Matlin, A. M., 270, 333, 378
Meckling, W. H., 259
Military sector: innovativeness of, 506-508; "spillovers" from, 511, 517-518
Ministers, 37-38
Ministries: abolition of (in 1957), 112-113; number of, 36; R&D duplicated by, 112-113; restored (in 1965) 80; types of, 36
Ministry: corporation's r 'ationship to, 133-134; depreciation rese ›s redistributed by, 176-177; financing of &D by, 172; incomes of managers det mined by, 403, 411, 431, 453; innovat. n responsibilities of, 45-47, 50-52, 126; a d New Products Fund, 202-203, 273; org .nizational structure of, 37-38; "petty tu elage" by, 130, 525; pricing functions of, 361-367, 382; supply planning by, 68-70; system affects diffusion, 223; trust in managers by, 202
Ministry of Finance, 133, 177, 187, 381, 403, 406; in economic planning, role of, 35, 44; and innovation bonuses, 453, 456; in price administration, role of, 362, 367
Ministry of Foreign Trade, 36, 44, 367, 463
Mission-oriented projects, 517; defined, 506; contrasted to economic activity, 507-508
Model changes, 197-198
Monopoly: central planning generates, 528-529; by production associations (corporations), 136; by R&D organizations, 121-126
Mstislavskii, P. S., 280
Mueller, W., 108
Mutual involvement, net of, 140

Nelson, R. R., 259
New enterprises: design errors in, 371-372; diffusion of innovation in, 57-58, 504-505; promote innovation under capitalism, 533
New processes: adopters lack knowledge of, 219; resistance to adoption of, 215; *see also* Innovation, process
New Product Bonus Supplements, 423-424, 460-461
New products: bonus for export of, 463-464; definition of, 200, 288, 375, 383-384, 425, 470-471; demand for, 209-234; New Products Fund subsidizes, 203, 271-274; pricing of, 277-335; profit rates too low on, 203, 237-254, 269-271, 308, 322-323, 350, 371; resistance to adoption of, 215-218, 269, 305; spurious introduction of, 282; and standards, 247-249; supplements to Bonus Fund for, 423-424, 460-461; types of, 308; users lack knowledge of, 219; *see also* Innovation, product
New products, cost of: declines over time, 264-269; high, reasons for, 258-271; ignored in cost-reduction target, 420-421; underestimated, 259-261

New Products Fund (*Fond osvoeniia novoi tekhniki*), 279, 459; misappropriation of, 202-203; as source of financial resources, 199-204; subsidizes start-up costs, 271-274
New Technology Plan, 456, 463; expressed as "number of innovations," 457-458; simulated fulfillment of, 470
Nimitz, N., 508

Oblomov, 519
Obsolescence, 291, 313
Optimality: in analogue pricing, 317; in choice among innovations, 465; dialectics contrasted to, 317; in model variety, 198; of output mix, 409-410; of product differentiation, 378; in replacement policy, 352; of technological level, 355
Organizational structure: authority to determine, 140-142, 147; and behavior, 125; defined, 12-14, 29-30; formal models of, 13; monopolistic, of R&D organizations, 121-126; origins of, in capitalism and USSR, 98; and R&D services, quality of, 101-104; uniformity of, 21-22
Original products: defined, 328; number of, 333; pricing of, 328-330
Output: rate of, determines unit cost, 265-267; rule dominated rules structure, 409-411, 413-414; target expressed in tonnage, 146, 239

Parametric series, 325, 327
Patent, 464; *see also* Certificate of Invention
Paton, B. E., 109, 277
Performance guarantees, 217, 348-349
Personal management (*edinonachalie*), 138-139, 143

Presidium, *see* Council of Ministers
Price: Adjustment Fund, 292; administration, 361-393; approval of, delays in, 369-370; "basic," in product-improvement pricing, 344-346; departments, 362-363; discounts, 342, 350-352; indexes, inflation of, 281, 283, 379; influence of, on decision making, 238-339, 334; lower-limit, 309-310; and New Products Fund subsidy, 202; optimal, 313-319; originates in enterprise, 361; regulations, evasion of, 332-334, 342, 374-375; retail, 240; setting, proposed decentralization of, 390-393; surcharges, 334, 341-350; upper-limit, 308, 310-313; wholesale, 240, 242, 309, 311, 315-316, 321, 334
Price catalogues, 247, 325, 333, 341, 362-363, 368, 371-372; availability of, limited, 387; in "basic price" method, 344-346; ignored in pricing, 374; new products not listed in, 371; number of, 364; revisions of, 363; size of, 364; surcharges and discounts in, 342-343
Price controls, 380-389; by committees of experts, 381-384; conflicts of interest in, 382; by customers 384-389; difficult with changing technology, 383-384; limited resources for, 382
Price flexibility, methods of achieving: revisions of prices, 291-292; stepwise pricing, 293-298; surcharges and discounts, 292, 341-352; temporary prices, 277-290
Price revisions, 372, 390; by computer, 325-326; effort involved in, 364-365; general, 244-245; partial, 245
Prices: accounting, 247; adjusted by "coefficients of deficitness," 466; equilibrium, 242; of established products, 240-247; importance of, to enterprise, 239-240; inefficiency of, 465-466; manuals for setting, 307-308, 313-315, 363; marginal-cost, 242, 255 n16; market-clearing, 255 n18; number of, 364; of original products, 328-330; and quality standards, 247-249; of special-order products, 330-333; stability of, 244-246; structure of, 9-10; of substitutable products, 307; zonal, 246
Prices, temporary, 253, 277-290, 329, 367; abuses of, 279-283; curtailment of (1966), 288-289; profit rates on, 284-285, 289; re-

Prices (continued)
surgence of, 334; spurious innovation encouraged by, 337
Pricing, analogue: method, 308-319; political attacks on, 310-311; problems of, 319-324; for product improvements, 343-348
Pricing, cost-based: deficiencies of, 303-305; extent of, 333-335; high-cost production encouraged by, 304, 331; inequitable to product innovators, 314-315; innovation discouraged by, 302-303; productivity of innovations reduced because of, 305; satisfactory in absence of technological change, 301
Pricing, parametric: method, 324-325; problems of, 325-327; for product improvements, 343, 348
Pricing, principles of: cost-plus-profit, 240-244; permanent prices, 244-246, 278, 290-292, 375-376; uniformity of prices, 246-247, 280-281, 291, 351
Pricing, stepwise, 393-398
Priority sectors, 506-509
Product-design (*konstruktorskii*) organization, 39
Product differentiation, 378-380
Product improvements: economic importance of, 54, 354-355; low-performance-low-priced, discriminated against, 354-358; pricing of, 339-358; unproductive, 353-354
Product-mix rule, 409-410
Production association, 1974 Statute on, 142-147; *see also* Associations; Corporations
Production Development Fund (*fond razvitiia proizvodstva*): 77, 174, 182-191, 428, 443
Production-engineering (*proektnyi*) organization, 39
Production-preparation stage, 263
Productivity, in new-product pricing, 301-335
Profit: excess, opposition to, 321; free balance of, 176, 178-180; markup, 242-244; net and gross, 430, 433; and profit rate, as decision rules, 432-434; reasons for seeking, 412-413, 432; role of, enhanced after Economic Reform (1965), 432, 438; sharing, 452, 456, 535; tax, 176; unearned, hostility toward, 322-324
Profit, used for financing: Bonus Fund, 429, 432; capital charge, 176, 430; centralized capital investment, 176-177; decentralized capital investment, 182-183; Enterprise Fund, 182; investment credits, repayment of, 178, 191; profit tax, payment of, 976
Profit rate: in analogue pricing, 320-324; ceiling on, 321-324, 348-349; on new and old products, 237-254; on older products exaggerated by spurious innovation, 380; on original products, 330; as percentage of capital, 243-244, 433, 438; as percentage of cost, 243-244; Production Development Fund depends on, 184-187; role of, enhanced (1958), 426-427; on special-order products, 331-333; for temporary prices, 284-285; and total profit, as decision rules, 432-434; variations of, among industries, 243, 245; variations of, among products, 246
Profit rule: classical, 411-413; after Economic Reform (1965), 432-434; weighted, 427
Property right, in invention, 450
Purchase authorization (*limit*), 86
Purchasing, *see* Supply
Pushers, 370

Quality: adjustment, in Bonus Fund, 431, 440-441; control, 2, 111, 248, 346; excessively high, 353-355; grades of, standardized, 347-349, 431; and innovation rules, 435; pressures to reduce, 248, 356; "problem" of, 340-341, 346; Seal of, 135, 346-349; simulation in defining, 470-471; static analysis of, 340-341, 355, 441
Quality Certification Commission, 385-386
Quantitative analysis of Soviet economy, 20-22

R&D: calculation of economic benefit from, 118; coordination of, between ministries, 135; duplication of, 100, 112-113, 121-125, 147 n3; division of, between research work and development work, 191; enterprise-financed, 173-175; expenditures on, 504; facilities in corporations, 143; "limit price" in, 363-364; organizational structure of, 99, 102-103; parallel, 123, 126-128; performance guarantees on, 118; quality of, 100-104, 111, 134; state-budget financed, 172-173
R&D, competition in, 120-129; 1968 decree on, 126-129
R&D, in-house, 98, 104-108, 143; concentrates on products, not processes, 221; extensiveness of, 105-106; financing of, 174;

R&D, in-house (continued)
as objective of corporations, 132; quality of personnel in, 196; reluctance to undertake, 106-108
R&D institutes: ministry-financing of, 172-173; number of, 39; as originators of innovations, 52-53; planning in, 45-46; proliferated under Regional Economic Councils, 113; role of, in price administration, 365-367; state-budget financing of, 172, *see also* R&D organizations
R&D organizations: budget-financing of, 114-117; contract-financing of, 53, 115-120, 174; criticized as monopolists, 121; financial liability of, 117-118; liability of, for poor work, 104
R&D organizations, types of: construction-engineering organization, 40; design bureau, 239; engineering-design organization, 39-40; higher education institutions, laboratories of, 39; product-design organization, 39; production-engineering organization, 39-40; project-making institute, 39; R&D institute, 39; scientific research laboratory, of enterprise, 33; special design bureau, 105
R&D personnel, 503-504; conflict with production personnel, 144-146; measures to upgrade, 111; quality of, in in-house R&D, 106
Ratchet: principle, 15, 404, 419; rule, 408-409, 412, 418, 435-437, 440, 442
Recoupment period, 455
Regional Economic Councils (*sovnarkhozy*), 18, 83, 129-130; number of R&D institutes increased under, 112-113; quality of R&D declined under, 112-113
Replacement: of capital, 185-186, 191; policy, 352
Research complexes, 116
Retained earnings, 176; *see also* Profit
Risk, 181, 259, 421, 458; and competition, 527-528; of innovation, 217, 219; minimized by avoiding innovation, 524; not studied in USSR, 521; under perfect and imperfect planning, 523-524; relative to reward, 520-522; sales-revenue rule increases, 44, 231; State as bearer of, 536, 540 n43; of underfulfilling output plan, 414, 416
Rules, *see* Decision rules

Safety factor, 42, 71, 259; in financial plan, 181; in labor hoarding, 165; in output planning, 211; and target rule, 408
Salaries of managers, 403, 475-478
Sales: efforts by innovators, informal, 220, 224, 228; importance of, increased since Economic Reform (1965), 215; responsibility for, diffused, 214, 220, 231; system, organization of, 210; *see also* Selling
Sales revenue: determines Bonus Fund, 430; determines Production Development Fund, 184-187; rule, 229-231, 434, 441
Saratov system, 111
Scale, economies of: affect innovators' profit rates, 266-267; in calculation of economic benefit, 466-467; and infrequent model changes, 197; raise first innovator's costs, 261-262
Scherer, F. M., 260
