

INDEX

- Accounting identity, 449–450, 454
ACMS (Arrow-Chenery-Minhas-Solow) function, 404, 447, 451–452, 454
Activities
 economical and noneconomical, 310, 312, 318
 eligible, 313
Adaptive expectations, 405
Aggregated data, 444–445
Aggregation, 208, 286–288, 291–292, 403–404, 411–441
 level of, 434
Agricultural analogy. *See* Substitutability of commodities
Agricultural Revolution, 262
Agriculture
 capital employed in, 276–280
 labor employed in, 275–276
Air pollutants, health effects of, 99–101
Air pollution, 394–396. *See also* Auto emissions
 and residential choice, 72–73
Air quality
 ambient, 100–101
 and automobile emissions, 99–110
 consumer demand for, 106
 relation of emissions to, 101–103
Alford, L. P., 193
All-or-none solutions, 247–259
Ando, Albert, 404, 406, 411–441
Andrews, W. H., 447, 449, 459
Approximation, justification of, 412
Arrow, K. J., 6, 180, 183–184, 193, 208, 233, 458
Arrow Impossibility Theory, 4
Artificial intelligence, 248, 266–267
Artle, R., 262–263, 268
Aspiration levels, 400–401
Atomic power, 263–265, 281
 characteristics of, 326
 estimating effects of, 328–340
 industrialization through, 354–379
 macroeconomic effects of, 263–265, 325–353. *See also* Energy
Auto emissions, 394–396. *See also* Air pollution
 in total health problem, 103–105
Autocorrelation coefficients, 173–176, 188
Automobile emission controls, 5–6, 99–110
 costs and benefits of, 105–108
Babbage, Charles, 380–382, 388–389
Backward areas. *See* Developing areas
Bain, H. F., 370
Balderston, J. B., 440
Bandwagon effects, of public predictions, 460–469
