General Information

Subscriptions and Single Issues

Individuals

Individuals may subscribe directly from MIT Press Journals or shop online. See ordering information on p. 42.

Subscriptions purchased at the individual rate may not be transferred to an institution.

Subscriptions purchased at the individual, student, and retired rates are strictly for personal, non-commercial use only. The reselling of these subscriptions is strictly prohibited.

Libraries

Libraries may order through an agent or directly from MIT Press Journals.
mitpressjournals.org

Consortia

For consortia price information, contact:
jdpcs-licenses@mit.edu

Our terms and conditions for subscription agents and direct subscribers are included in our 2018 Price List available online at mitpressjournals.org under "Resources."

Agencies

Agencies receive a 3% discount on all orders.

Exclusive Agent in Japan:
Kinokuniya Company Ltd.
Journal Department
3-7-10 Shimomeguro
Meguro-ku
Tokyo 153-8504
JAPAN
kinokuniya.com

All individuals subscribing through subscription agencies must pay institutional rates.

Claims Policy

To be honored free of charge, claims for missing issues must be made within three months of the issue mail date. For claims, contact:
journals-cs@mit.edu

Permissions Information

To request copyright permission from MIT Press Journals, please contact:

Journal Packages

Libraries and institutions can offer a wide range of high-quality scholarship, including many of the most influential titles in their fields, from MIT Press by subscribing to journal packages: either the full journal program, or subject-specific collections.

All packages feature:

- DRM-free content
- Unlimited simultaneous users
- Free access to backfile content for duration of subscription (many titles go back to 1999)
- Compatible with mobile devices
- Citation download, social sharing, TOC alerts
- COUNTER usage reporting

Pricing

Package subscriptions give you the content you need from a trusted publisher at a discounted price.

	Online-only	Print & Online	Postage*
Arts & Humanities	\$2,846.70	\$3,285.00	\$276
Economics	\$1,429.20	\$1,677.60	\$119
Int'l Affairs, History, Political Science	\$1,367.10	\$1,502.10	\$96
Science & Technology	\$4,125.60	\$4,449.60	\$60
Full collection	\$9,225.90	\$10,307.95	\$551

Canadian subscribers add 5% GST.

*Customers outside the US & Canada please add postage indicated to Print & Online package price. Discounts may not be applied to postage.

Additional discounts are available for consortia. Contact Jessica Lawrence-Hurt, institutional sales manager, for more information: jclh@mit.edu

For more information, or to request a trial, please contact: jdpcs-licenses@mit.edu

Electronic Only

Artificial Life

Mark A. Bedau, Editor

Since its premiere in the fall of 1993, *Artificial Life* has become the unifying forum for the exchange of scientific information on the study of man-made systems that exhibit the behavioral characteristics of natural living systems. These systems can be synthesized in software, hardware, or wetware. Each issue features international research that spans the hierarchy of biological organization, including studies of the origin of life, self-assembly, growth and development, evolutionary and ecological dynamics, animal and robot behavior, social organization, and cultural evolution.

The journal shapes and chronicles the development of artificial life, extending the horizons of empirical research in biology beyond the territory circumscribed by life-as-we-know-it and into the domain of life-as-it-could-be.

Artificial Life is the official journal of the International Society for Artificial Life (ISAL). Subscriptions to *AL* include ISAL membership.

- Canadians add 5% GST.

Artificial Life is included in MIT CogNet (see p. 40) and the IEEE Xplore Digital Library; journal content may be accessed through those subscription-based products.

Computational Linguistics

Paola Merlo, Editor-in-Chief

Computational Linguistics is the longest-running publication devoted exclusively to the computational and mathematical properties of language and the design and analysis of natural language processing systems. From this highly-regarded quarterly, university and industry linguists, computational linguists, artificial intelligence and machine learning investigators, cognitive scientists, speech specialists, and philosophers get information about the computational aspects of all the facets of research on language.

Pricing

Computational Linguistics is an Open Access journal. The content is freely available to all online readers.

Computational Linguistics is included in MIT CogNet (see p. 40); journal content may be freely accessed through this online platform.

Computational Psychiatry

Peter Dayan and Read Montague, Editors

Computational Psychiatry publishes original research articles and reviews that involve the application, analysis, or invention of theoretical, computational and statistical approaches to mental function and dysfunction. Topics include brain modeling over multiple scales and levels of analysis, and the use of these models to understand psychiatric dysfunction, its remediation, and the sustenance of healthy cognition through the lifespan. The journal also has a special interest in computational issues pertaining to related areas such as law and education.

Pricing

Electronic Only

Evolutionary Computation

Emma Hart, Editor-in-Chief

Evolutionary Computation is a leading journal in its field. It provides an international forum for facilitating and enhancing the exchange of information among researchers involved in both the theoretical and practical aspects of computational systems drawing their inspiration from nature, with particular emphasis on evolutionary models of computation such as genetic algorithms, evolutionary strategies, classifier systems, evolutionary programming, and genetic programming. It welcomes articles from related fields such as swarm intelligence (e.g. Ant Colony Optimization and Particle Swarm Optimization), and other nature-inspired computation paradigms (e.g. Artificial Immune Systems). As well as publishing articles describing theoretical and/or experimental work, the journal also welcomes application focused papers describing break-through results in an application domain or methodological papers where the specificities of the real-world problem led to significant algorithmic improvements that could possibly be generalized to other areas.

Journal of Cognitive Neuroscience

Mark D'Esposito, MD, Editor-in-Chief

Michael S. Gazzaniga, Founding Editor

Jeffrey R. Binder, Roshan Cools, Todd F. Heatherton,
 George R. Mangun, Anthony R. McIntosh, Earl K. Miller,
 Anna C. Nobre, Brad Postle, and Jordan Taylor, Associate
 Editors

Charlotte Smylie, Managing Editor

Journal of Cognitive Neuroscience investigates brain-behavior interaction and promotes lively interchange among the mind sciences. Contributions address both descriptions of function and underlying brain events and reflect the interdisciplinary nature of the field, covering developments in neuroscience, neuropsychology, cognitive psychology, neurobiology, linguistics, computer science, and philosophy.

Linguistic Inquiry

Samuel Jay Keyser, Editor-in-Chief

Linguistic Inquiry leads the field in research on current topics in linguistics. In each issue its authors keep themselves and other readers informed of new theoretical developments based on the latest international scholarship, capturing the excitement of contemporary debate in full-scale articles as well as with shorter contributions (Squibs and Discussion) and more extensive commentary (Remarks and Replies).

Network Neuroscience

Olaf Sporns, Editor

Danielle S. Bassett, Edward T. Bullmore, Alexander Fornito, Claus C. Hilgetag, and Daniel Geschwind, Senior Editors

Network Neuroscience features innovative scientific work that significantly advances our understanding of network organization and function in the brain across all scales, from molecules and neurons to circuits and systems.

Positioned at the intersection of brain and network sciences, the journal covers empirical and computational studies that record, analyze or model relational data among elements of neurobiological systems, including neuronal signaling and information flow in circuits, patterns of functional connectivity recorded with electrophysiological or imaging methodology, studies of anatomical connections among neurons and brain regions, and interactions among biomolecules or genes. The journal aims to cover studies carried out in all neurobiological systems and all species, including humans.

Network Neuroscience publishes Research, Methods, Data, Review and Perspective articles.

Prices

Network Neuroscience is an Open Access journal. The content is freely available to all online readers.

Electronic Only

Neural Computation

Terrence Sejnowski, Editor-in-Chief

Neural Computation disseminates important, multidisciplinary research in theory, modeling, computation and statistics in neuroscience and in the design and construction of neurally-inspired information processing systems. This field attracts psychologists, physicists, computer scientists, neuroscientists, and artificial intelligence investigators working on the neural systems underlying perception, emotion, cognition and behavior, and artificial neural systems that have similar capabilities. Powerful new experimental technologies being developed by the BRAIN Initiative will produce large, complex data sets, and rigorous statistical analysis and theoretical insight will be essential for understanding what these data mean. Timely, short communications, full-length research articles, and reviews focus on advances in the field and cover all aspects of neural computation.

Open Mind

Discoveries in Cognitive Science

Richard N. Aslin, Editor

George Alvarez, Elizabeth Brannon, Sharon Goldwater,
Lori Holt, Barbara Landau, Roger Levy, Daniel Navarro,
Nicholas Turk-Browne, Associate Editors

Open Mind provides a new venue for the highest quality, most innovative work in cognitive science, offering affordable open access publishing, concise and accessible articles, and quick turnaround times for authors. The journal covers the broad array of content areas within cognitive science using approaches from cognitive psychology, computer science and mathematical psychology, cognitive neuroscience and neuropsychology, comparative psychology and behavioral anthropology, decision sciences, and theoretical and experimental linguistics. These approaches are applicable to a broad range of content areas, including learning and memory, attention and object recognition, language processing and development, causal reasoning, judgment and decision-making, philosophy of mind, and more.

Pricing

Open Mind is an Open Access journal. The content is freely available to all online readers.

Electronic Only

Presence

Teleoperators and Virtual Environments

Roy Ruddle and Janet Weisenberger,
Co-Editors-in-Chief

The longest-established academic journal that is devoted to research into teleoperation and virtual environments (3D virtual reality worlds), *Presence: Teleoperators and Virtual Environments* is filled with stimulating material about fundamental research into topics such as presence, augmented reality, haptics, user interfaces, and virtual humans, and applications that range from heritage and education to training simulators, healthcare, and entertainment.

Presence appeals to a wide audience that includes computer scientists, high-tech artists and media people, psychologists involved in the study of human-machine interfaces and sensorimotor/cognitive behavior, and mechanical and electrical engineers.

African Arts

African Arts Consortium members:

UCLA: Marla C. Berns, Patrick A. Polk, Allen F. Roberts,
 Mary Nooter Roberts

Rhodes University: Ruth Simbao

University of Florida: Susan Cooksey, Fiona McLaughlin,
 Rebecca M. Nagy, Robin Poynor, MacKenzie Moon Ryan

UNC at Chapel Hill: Lisa Homann, Carol Magee,
 David G. Pier, Victoria L. Rovine

African Arts presents original research and critical discourse on traditional, contemporary, and popular African arts and expressive cultures. Since 1967, the journal has reflected the dynamism and diversity of several fields of humanistic study, publishing richly illustrated articles in full color, incorporating the most current theory, practice, and intercultural dialogue. The journal offers readers peer-reviewed scholarly articles concerning a striking range of art forms and visual cultures of the world's second-largest continent and its diasporas, as well as special thematic issues, book and exhibition reviews, features on museum collections, exhibition previews, artist portfolios, photo essays, edgy dialogues, and editorials. *African Arts* promotes investigation of the interdisciplinary connections among the arts, anthropology, history, language, politics, religion, performance, and cultural and global studies.

ARTMargins

Sven Spieker, Executive Editor

Karen Benezra, Francesca Dal Lago, Octavian Esanu, Anthony Gardner, Angela Harutyunyan, and Andrew Weiner, Editors

ARTMargins publishes scholarly articles and essays about contemporary art, media, architecture, and critical theory. *ARTMargins* studies art practices and visual culture in the emerging global margins, from North Africa and the Middle East to the Americas, Eastern and Western Europe, Asia and Australasia. The journal seeks a forum for scholars, theoreticians, and critics from a variety of disciplines who are interested in art and politics in transitional countries and regions; postsocialism and neo-liberalism; postmodernism and postcolonialism, and their critiques; and the problem of global art and global art history and its methodologies.

Computer Music Journal

Douglas Keislar, Editor

Computer Music Journal is published quarterly with an annual sound and video anthology containing curated music¹. For four decades, it has been the leading publication about computer music, concentrating fully on digital sound technology and all musical applications of computers. This makes it an essential resource for musicians, composers, scientists, engineers, computer enthusiasts and anyone exploring the wonders of computer-generated sound.

Edited by experts in the field and featuring an international advisory board of eminent computer musicians, issues typically include:

- In-depth articles on cutting-edge research and developments in technology, methods, and aesthetics of computer music
- Reports on products of interest, such as new audio and MIDI software and hardware
- Interviews with leading composers of computer music
- Announcements of and reports on conferences and courses in the United States and abroad
- Publication, event, and recording reviews
- Tutorials, letters, and editorials
- Numerous graphics, photographs, scores, algorithms, and other illustrations.

MIT Press Journals offers *CMJ* and the annual publication, *Leonardo Music Journal* (see p. 22), at a special subscription price; see details below.

¹The annual sound and video anthology is posted online. It was published as a CD in Volumes 22-26 and as a DVD in Volumes 27-37. Electronic access to the content of the annual discs of Volumes 34-40 is now available.

Dædalus

Journal of the American Academy of Arts and Sciences

Phyllis S. Bendell, Managing Editor

Drawing on the nation's foremost scholars in the arts, sciences, humanities, and social sciences, *Dædalus, Journal of the American Academy of Arts and Sciences*, explores the frontiers of knowledge and issues of public importance. Recent issues have examined Political Leadership; Ethics, Technology & War; Russia Beyond Putin; The Prospects & Limits of Deliberative Democracy; the Successful Aging of Societies; and Water and the Future of Food, Health and the Environment.

About the American Academy

Since its founding in 1780, the American Academy of Arts and Sciences has served the nation as a champion of scholarship, civil dialogue, and useful knowledge. Through studies, publications, and programs on science, engineering, and technology; global security and international affairs; the humanities, arts, and education; and American institutions and the public good, the Academy examines the most pressing problems facing our nation and the world.

Design Issues

History/Theory/Criticism

**Bruce Brown, Richard Buchanan, Carl DiSalvo,
Dennis Doordan, Kipum Lee, Victor Margolin,
and Ramia Mazé, Editors**

The first American academic journal to examine design history, theory, and criticism, *Design Issues* provokes inquiry into the cultural and intellectual issues surrounding design. Regular features include theoretical and critical articles by professional and scholarly contributors, extensive book and exhibition reviews, and visual sequences. Special guest-edited issues concentrate on particular themes, such as design history, human-computer interface, service design, organization design, design for development, and product design methodology. Scholars, students, and professionals in all the design fields are readers of each issue. *Design Issues* is a peer-reviewed journal.

Grey Room

Zeynep Çelik Alexander, Lucia Allais,
Eric C.H. de Bruyn, Noam M. Elcott, Byron Hamann,
John Harwood, and Matthew C. Hunter, Editors

Grey Room brings together scholarly and theoretical articles from the fields of architecture, art, media, and politics to forge a cross-disciplinary discourse uniquely relevant to contemporary concerns. Publishing some of the most interesting and original work within these disciplines, *Grey Room* has positioned itself at the forefront of the most current aesthetic and critical debates. Featuring original articles, translations, interviews, dossiers, and academic exchanges, *Grey Room's* emphasis on aesthetic practice and historical and theoretical discourse appeals to a wide range of readers, including architects, artists, scholars, students, and critics.

Journal of Design and Science

Joi Ito, Editor

The Journal of Design and Science (JoDS) captures the antidisciplinary ethos of the MIT Media Lab. Like the Lab, it opens new connections between science and design, encouraging discourse that breaks down the barriers between traditional academic disciplines. It explores not only the design of science, but also the science of design.

With this innovative approach, *JoDS* intends to incite much-needed change in academic publishing by challenging traditional academic silos as well as the established publishing practices associated with them.

The journal is hosted on an open-access, open-review, rapid publication platform called PubPub, created by students at the Media Lab. PubPub is a collaborative publication environment with rich commenting features, and powerful, intuitive authoring tools. *JoDS* articles are authored directly within the PubPub environment, which provides support for multimedia, image integration, and large data sets.

Unlike journals that operate within a formal peer review system and rigid disciplinary framework, *JoDS* invites jargon-free communication across all fields of design and science, unconventional formats, and widespread community participation. *JoDS* empowers authors to engage in fruitful, ongoing discussion about their work with members of many different communities, both within and outside of their home disciplines. This rich, peer-to-peer approach to review provides for a much broader array of perspectives, new pathways forward, and emergent topics for further research.

JoDS is shepherded by a team led by MIT Media Lab Director Joi Ito, and published in partnership with the MIT Press. All *JoDS* articles are published under a CC-BY 4.0 License.

Pricing

JoDS is an Open Access journal. The content is freely available to all online readers.

Leonardo

Roger F. Malina, Executive Editor

Leonardo is the leading international peer-reviewed journal on the use of contemporary science and technology in the arts and music and, increasingly, the application and influence of the arts and humanities on science and technology.

The annual companion journal, *Leonardo Music Journal* (*LMJ*, see p. 22), focuses on science, technology, sound, and music. All subscribers to *Leonardo* receive *LMJ* as part of a yearly subscription.

Subscribers to *Leonardo* become associate members of Leonardo/ISAST (International Society for the Arts, Sciences and Technology) and receive reduced rates on all ISAST publications and activities.

Leonardo provides readers with special features through the MIT Press Journals site: supplementary multimedia and audio files to accompany article content and the Just Accepted program, which publishes manuscripts that have been accepted by the journal up to three months prior to publication.

All subscribers to Leonardo receive LMJ as part of a yearly subscription.

Leonardo Music Journal

Nicolas Collins, Editor-in-Chief

Roger F. Malina, Executive Editor

Leonardo Music Journal (LMJ) is the annual companion journal to *Leonardo*. *LMJ* is devoted to aesthetic and technical issues in contemporary music and the sonic arts. Each thematic issue features artists and writers from around the world, representing a wide range of stylistic viewpoints. Recent issues have covered improvisation, musical communities, live performance in the digital age, and the politics of sound art. Each volume includes the latest offering from the *LMJ* audio series—an exciting sampling of works chosen by a guest curator and accompanied by notes from the composers and performers.

Institutional subscribers to *Leonardo* receive *LMJ* as part of a yearly subscription. Individuals may subscribe to *LMJ* alone or as part of their subscription to *Leonardo* (see p. 21).

MIT Press Journals offers *LMJ* and the quarterly publication *Computer Music Journal* (see p. 16) at a special combined subscription price; see details below.

The New England Quarterly

Jonathan M. Chu, Editor

Betsy Klimasmith and Leonard von Morzé,
Associate Editors

For 90 years, *The New England Quarterly* (NEQ) has published the best that has been written on New England's cultural, literary, political, and social history. Contributions cover a range of time periods, from before European colonization to the present, and any subject germane to New England's history—for example, the region's literary and artistic productions, its political practice and philosophies, race relations, labor struggles, religious controversies, and the organization of family life. The journal also aims to demonstrate the importance of regional studies by encouraging work treating the migration of New England ideas, people, and institutions to other parts of the United States and the world. In addition to major essays, features include memoranda and edited documents, reconsiderations of traditional texts and interpretations, essay reviews, and book reviews.

TDR/The Drama Review

The Journal of Performance Studies

Joining **Editor Richard Schechner** and **Associate Editor Mariellen R. Sandford** of New York University, the Consortium Editors are:

Brown University: **Rebecca Schneider**

Shanghai Theatre Academy: **William Huizhu Sun**

Yale University: **Joseph Roach, Tavia Nyong'o, Elise Morrison**

TDR addresses the broad spectrum of performance: performances in their aesthetic, social, economic, political, and historical contexts. With an emphasis on experimental, avantgarde, intercultural, and interdisciplinary performance, *TDR* publishes materials about performance art, theatre, dance, music, visual art, popular entertainments, media, sports, rituals, and the performance in and of politics and everyday life. Long known as the basic resource for cutting-edge scholarship in performance studies, *TDR* continues to be the most relevant and lively forum for new ideas concerning performances in every medium, setting, and culture.

Each fully illustrated issue includes:

- Articles on theatre, dance, music, popular entertainments, rituals, politics, and social life
- Original contributions to performance theory
- Editorial comments, critical analysis, performance and book reviews
- Articles by social scientists, cultural commentators, theorists, artists, scholars, and critics
- Interviews with performers, choreographers, directors, composers, and performance artists
- Texts of performance works
- Translations of important new and decisive archival writings on performance

Global Environmental Politics

Kate O'Neill and Stacy D. VanDeveer, Editors

Global Environmental Politics examines relationships between global political forces and environmental change, with particular attention given to implications of environmental change and environmental governance for world politics. Each issue is divided into full-length research articles and shorter forum articles. The journal seeks to publish on a broad range of issues, from water to waste management to climate change. Topics covered include, but are not limited to, states and non-state actors in environmental governance, multilateral institutions and agreements, innovative governance arrangements, trade, global finance, corporations and markets, environmental (in)security, science and technology, and transnational and grassroots movements. Contributions come from many disciplines, including political science, international relations, sociology, history, human geography, anthropology, public policy, science and technology studies, and environmental ethics, law, economics.

International Security

Steven E. Miller, Editor-in-Chief

Sean M. Lynn-Jones and Owen R. Coté Jr., Editors

Diane J. McCree, Managing Editor

International Security publishes lucid, well-documented essays on the full range of contemporary security issues. Its articles address traditional

topics such as war and peace, as well as more recent dimensions of security, including the growing importance of environmental, demo-graphic, and humanitarian issues, and the rise of global terrorist networks.

International Security has defined the debate on US national security policy and set the agenda for scholarship on international security affairs for more than forty years. For many years, *International Security* has been consistently at or near the top of the Thomson Reuters Impact Factor rankings of all international relations journals.

Readers of *IS* discover new developments in:

- The causes and prevention of war
- U.S.-China relations
- Ethnic conflict and internal war
- Terrorism and insurgency
- Asian, European, and regional security
- U.S. foreign and defense policy
- Nuclear proliferation
- International relations theory
- Diplomatic and military history
- Cybersecurity

International Security is published by the MIT Press for the Belfer Center for Science and International Affairs, Harvard University.

Impact Information

- #1 in International Relations (2015 Thomson Reuters Journal Citation Reports)
- #1 in Political Science and International Relations (2015 SCImago Journal & Country Rank)
- A* in Political Science and International Relations (2016 Australian Political Science Association Journal Rankings)

Journal of Cold War Studies

Mark Kramer, Editor

The *Journal of Cold War Studies* features peer-reviewed articles based on archival research in the former Communist world and in Western countries. Articles in the journal draw on declassified materials and new memoirs to illuminate and raise questions about numerous historical and theoretical concerns: theories of decision-making, deterrence, bureaucratic politics, institutional formation, bargaining, diplomacy, foreign policy conduct, and international relations. Using the latest evidence, the authors subject these theories, and others, to rigorous empirical analysis. The journal also includes an extensive section of reviews of new books pertaining to the Cold War and international politics.

The journal is published by the MIT Press for the Harvard Project on Cold War Studies.

The Journal of Interdisciplinary History

Robert I. Rotberg, Theodore K. Rabb,
and Reed Ueda, Editors

The Journal of Interdisciplinary History features substantive articles, research notes, review essays, and book reviews that combine the study of history, spanning all geographical areas and periods, with other scholarly disciplines, including:

- Archaeology/Material Culture
- Art
- Big Data
- Biography/Psycho-biography
- Biology
- Climate/Environment
- Economics
- Geoscience/GPS
- Opera/Theater
- Population/Demography
- Quantitative Methods
- Technology
- Urban Studies

The journal encourages contributions that demonstrate how methodological connections with other disciplines, and the methodologies of other disciplines, can throw light on the past.

American Journal of Health Economics

Frank Sloan, Editor in Chief

The *American Journal of Health Economics* (*AJHE*) provides a forum for the in-depth analysis of health care markets and individual health behaviors.

The articles appearing in *AJHE* are authored by scholars from universities, private research organizations, government, and industry. Subjects of interest include competition among private insurers, hospitals and physicians, impacts of public insurance programs, including the Affordable Care Act, pharmaceutical innovation and regulation, medical device supply, the rise of obesity and its consequences, the influence and growth of aging populations, and much more.

The journal is published by the MIT Press for the American Society of Health Economists (ASHEcon). ASHEcon is a professional, non-profit organization dedicated to promoting excellence in health economics research in the United States. All ASHEcon members receive the journal as part of membership.

Asian Development Review

Yasuyuki Sawada, Editor

Naoyuki Yoshino, Editor

Jesus Felipe, Managing Editor

The *Asian Development Review (ADR)* is the journal of the Asian Development Bank (ADB) and the Asian Development Bank Institute (ADBI). It publishes research on development issues relevant to the countries of the Asia and Pacific region, specifically ADB's member countries. The *ADR* publishes high-quality empirical papers, survey articles, historical analyses, and policy-oriented work. The *ADR* bridges theoretical work and rigorous empirical studies that advance the understanding of Asia's development; and it is open to discussions of alternative perspectives on all aspects of development, including globalization, inequality, structural transformation, and poverty. The *ADR* aims to disseminate the best research, with contributions from scholars in all fields, with the objective of providing the knowledge necessary for designing, implementing, and sustaining effective development policies. Its intended audience comprises a worldwide readership of economists and other social scientists.

Pricing

ADR is an Open Access journal. The content is freely available to all online readers. A limited number of print copies of each issue are available to purchase on a first-come, first-served basis.

Asian Economic Papers

Wing Thye Woo, Editor-in-Chief

Sung Chun Jung, Fukunari Kimura, Domenico Lombardi,
Ming Lu, and Jeffrey D. Sachs, Editors

Asian Economic Papers is sponsored by the Center for Sustainable Development, Columbia University, United States; the Korea Institute for International Economic Policy, South Korea; the Jeffrey Cheah Institute on Southeast Asia, Sunway University, Malaysia; the Economic Research Institute for ASEAN and East Asia, Indonesia; the Centre for International Governance Innovation, Canada; and Antai College of Economics and Management, Shanghai Jiao Tong University, China. *AEP*'s articles focus on high-quality, objective analysis of key economic issues of a particular Asian economy or of the broader Asian region, and offer creative solutions to these Asian economic issues.

AEP selects articles from open submissions and solicits articles from the top experts in the fields that are of high contemporary interest. Authors present their analyses at the Asian Economic Panel, which convenes thrice yearly in different parts of the world. The panel, which held its first meeting in April of 2001, invites about 40 leading economists from all over the world to each meeting to discuss the subjects of that particular meeting. *AEP* makes its publication decisions after reviewing the revised papers.

Education Finance and Policy

Amy Ellen Schwartz, Editor

Eric Brunner, Stephanie Cellini, Susanna Loeb,
and Katharine O. Strunk, Associate Editors

Ongoing public policy developments affecting educational institutions and systems present education policy makers, administrators, and researchers with new global challenges and opportunities. To aid in the deliberations, and help frame the intellectual discourse on education policy and practice, *Education Finance and Policy* promotes understanding of the means by which global resources can be justly generated and productively engaged to enhance human learning at all levels.

Topics explored in the journal include: school accountability; school choice; education standards; equity and adequacy in school finance; within- and across-school and district resource allocation; teacher compensation; training and labor markets; instructional policy; higher education productivity and finance; and special education.

The journal is published by the MIT Press for the Association for Education Finance and Policy.

The Review of Economics and Statistics

Amitabh Chandra (Co-Chair), Yuriy Gorodnichenko, Bryan S. Graham, Shachar Kariv, Amit K. Khandelwal, Asim Ijaz Khwaja (Co-Chair), Brigitte C. Madrian, and Rohini Pande, Editors

The Review of Economics and Statistics is a 100-year-old general journal of applied (especially quantitative) economics. Edited at the Harvard Kennedy School, *The Review* has published some of the most important articles in empirical economics. From time to time, *The Review* also publishes collections of papers or symposia devoted to a single topic of methodological or empirical interest.

Nautilus

John Steele, Publisher and Editorial Director

Michael Segal, Editor-in-Chief

Nautilus is a different kind of science magazine. It delivers deep, undiluted, narrative storytelling to bring science into the largest and most important conversations we are having today. It challenges the reader to consider the connecting tissue that runs through the sciences and connects them to philosophy, culture and art.

The print edition of *Nautilus* is distributed by the MIT Press. All digital content is housed at nautil.us; all subscriptions and single issues can be purchased there as well. Institutional subscriptions do not include access to digital content.

ARTECA is a curated space for essential content linking the arts, sciences, and technologies.

ARTECA houses thousands of pages of DRM-free book and journal content from the MIT Press: nearly 200 books and 500 journal issues from 4,000 contributors with new content added regularly.

Current highlights:

- *Leonardo* (19 volumes)
- *Leonardo Music Journal* (18 volumes)
- *Computer Music Journal* (19 volumes)
- Selections from five major MIT Press book series (Game Studies, Leonardo Book Series, Platform Studies, Software Studies, Technologies of Lived Abstraction)
- Videos and Podcasts
- COUNTER4-compliant Usage Stats
- Free MARC Records

ARTECA will also become a space for artists, practitioners, researchers, and educators to store, explore, and discuss their content—a space to archive work, grey literature, ephemera, and more.

Authoritative and unrivaled, MIT CogNet is the essential research tool for scholars in the Brain and Cognitive Sciences. Since its inception in 2000, MIT CogNet has become an indispensable resource for those interested in cutting-edge primary research across the range of fields that study the nature of the human mind.

Features include:

- More than 700 MIT Press books, 12 MIT Press reference works, and 6 MIT Press journals, with new content added regularly
- Over 435,000 pages of DRM-free content
- MARC records compiled by the MIT Libraries
- COUNTER4-compliant Usage Reporting
- New MITECS (*The MIT Encyclopedia of the Cognitive Sciences*)-based taxonomy for better browsing
- Responsive web design for an optimal viewing experience on any device

Reference Works

MIT CogNet offers the complete text of major cognitive science reference works published by the MIT Press, including several foundational works in the field. Titles include the fifth edition of a pioneering work, *The Cognitive Neurosciences* edited by Michael S. Gazzaniga and George R. Mangun. Other reference works available include *The MIT Encyclopedia of the Cognitive Sciences* (Wilson, Keil), *The Visual Neurosciences* (Chalupa, Werner), and *The Handbook of Brain Theory and Neural Networks*, second edition (Arbib), among others. MIT CogNet also offers previous editions of reference works, many of which contain unique material.

Books

MIT CogNet includes the full text of more than 700 books published by the MIT Press, and content is added regularly, approximately 30 new titles per year. Recent additions include *The Handbook of Attention* (Kingstone, Fawcett, Risko), *The Ancient Origins of Consciousness* (Feinberg, Mallatt) and *The Human Advantage* (Herculano-Houzel).

Journals

MIT CogNet provides access to the full text of six MIT Press journals: *Artificial Life*, *Evolutionary Computation*, *Computational Linguistics*, *Journal of Cognitive Neuroscience*, *Linguistic Inquiry*, and *Neural Computation*. These journals form the core of the MIT Press Journals science publishing program. Over 700 issues are housed within MIT CogNet.

Publishing with The MIT Press' Journals Division

The Journals division of the MIT Press began in 1972 with two quarterly publications, *Linguistic Inquiry* and *The Journal of Interdisciplinary History*. Today, we publish more than 30 titles in the arts and humanities, economics, international affairs, history, political science, and science and technology. The MIT Press was one of the first university presses to offer its journals electronically, and the division continues to adopt technologies that allow us to better support our scholarly mission to disseminate our content as widely as possible. The Press now supports multiple formats and delivers content to an array of devices while continuing to maintain a strong and thriving print presence for the majority of its titles. The division publishes journals owned by the MIT Press as well as journals sponsored by university departments, societies and associations.

The Press's services include online hosting, marketing, production, customer service, financial, subrights and permissions and much more. Our suite of traditional and digital publishing services can be customized to fit each journal's needs.

To inquire about publishing your journal with the MIT Press, please contact our Director of Journals and Open Access, Nick Lindsay, at nlindsay@mit.edu.
