Streetlights and Shadows

Searching for the Keys to Adaptive Decision Making

Gary Klein

A Bradford Book
The MIT Press
Cambridge, Massachusetts
London, England
### Index

Adapting, definition, 205  
Adaptive problem solvers, 153  
Algorithms in decision making, 115–119  
Anchoring bias. See Biases  
Anticipatory thinking, 158–163  
Artificial intelligence (AI), limits of, 202–204  
Authentic dissenters, 235  
Automated systems. See Decision support systems  
Automatic (intuitive) system, 116  
Biases, in decision making, 48–66. See also  
Heuristics  
anchoring and adjustment, 48–51  
framing, 49, 51–53  
representativeness, 49, 53, 54  
Biologically Inspired Computational Architectures (BICA), 202, 203  
Black swans, 231–233, 237, 239. See also  
Risk, mitigation  

Checklists. See Procedures  
Choice architects, 64, 65  
Cognitive rigidity, 270–272. See also  
Fixation  
Cognitive systems engineering, 125  
Common ground, 251–268, 290  
breakdowns in and erosion of, 253–268  
establishing, 252, 253, 263, 264  
Complexity, 295, 296  
Coordination. See Common ground  
Crystal ball method, 280  

Data overload. See Information overload  
Decision-making bias. See Biases  
Decision matrix, 84–86  
Decision support systems, 115–125  
Decision trees, 84, 85  
Devil’s advocate, 234, 235  
Discounting through differencing, 235  
DNA, double helix, 154–158  
Drucker, Peter, 207, 218  
Errors, 101–113  
related to mental models or mindsets, 101–109  
Expertise, 297, 298  
and errors, 104  
expanding, 107–111  
Experts, 101–113  
mental models, 101–104  
Explicit knowledge, definition, 33–36  
Feedback, 165–176, 288  
complex settings, 166–168  
detection of, 165–171  
distortion of, 168, 169  
outcome feedback, 166, 170  
process feedback, 166, 170  
on tacit knowledge, 170, 171  
Filtering, 135, 144  
Fixation, 147–151, 158, 270–282  
Frequency representation, 63, 64  

Gantt charts, 219–221  
Gimli Glider, 1–6, 105–106, 241  
Goals  
emergent goals, 212, 213, 295  
individual level, 218, 219  
project level, 216–218  
strategic level, 213–216
Goals (cont.)
goal field, 227
goal fixation, 221–223
goal tradeoffs, 208–212
Goldilocks Effect, 135

Heuristics, 49–66, 285, 286. See also Biases
anchoring and adjustment, 49–51
definition, 49
framing, 51–53
gaze heuristic, 59, 60
heuristics-and-biases research or paradigm, 54–61
representativeness, 53, 54
Hudson River landing, 91
Human-as-hazard model, 105–107, 112
Human-as-hero-model, 105–107

Information overload, 80, 129–146
Instructional Systems Design (ISD), 17
Intuition, definition, 71
automatic and reflective thinking, 93–94, 99–100, 115–116
intuition and analysis, 67–100
necessary conditions for developing, 107–111

Knowledge shields, 272. See also Fixation

Leadership, differing understandings of, 262. See also Common ground
Logical competitor sets, 280
Long Term Capital Management (LTCM), 81, 230, 231, 238

Macrocognition, 305, 326, 332
Management by Discovery (MBD), 223–228, 289
Management by Objectives (MBO), 218–228, 289
Memory, useful limitations of, 57–59. See also “Sins of memory”
Mental gears, 5–7
Mental models, 44, 101–107, 297, 298
changing, 272–281
diabetes, 107–111
Mental simulation, 90, 91, 96–98, 287
Mindsets. See Mental models
Multi-Attribute Utility Analysis. See Rational Choice method
Mysteries, distinguished from puzzles, 130
Myth, definition, 290

Number sense or number intuition, 93, 94
Numerical Weather Procedures (NWP), 123, 124

Overthinking, 76–80
conscious deliberation, 77, 78, 81
Pattern matching, 41–44, 93
typicality and anomaly, 43–44
Pattern recognition. See Recognition-Primed Decision
Positive psychology, 111–113
Premortem, 63, 235–236
Probabilistic Risk Assessment, 236, 237. See also Risk
Procedures, 15–32
adaptations and workarounds, 39–41
balancing with judgment, 28–31
misleading, 24–27
procedural checklists, 15–19, 21, 22, 29
procedural drift, 21, 22
procedural violations, 18
Project Phoenix, 122–125
Pronovost, Peter, 18
Puzzles, distinguished from mysteries, 130

Rational Choice method, 84, 85, 96–99, 119
Recognitional Planning Model, 98
Recognition-Primed Decision (RPD), 90–93, 98, 286
Recovery-oriented perspective, 300
Reflective (analytic) system, 115, 116
Resilience engineering, 247, 248
Risk
management, 229–249
mitigation, 229–249
Probabilistic Risk Assessment, 236, 237
Satisficing, 87, 88
Sensemaking, definition, 127, 146, 177, 178, 187–190, 194–197
“Sins of memory,” 58, 59
absent-mindedness, 58
blocking, 58
persistence, 59
transience, 58
Snakeskin metaphor, 277
Speculate-and-test strategy, 154–158
Statistics. See Systematic analysis
Storehouse metaphor, 277, 278, 281, 282
Systematic analysis, 67, 80–82
  intuition and analysis, 71–74
  logic and statistics, 67, 71, 72, 79, 82
Systematic errors, 59, 61, 62, 65
Systems engineering mindset, 292, 293

Tacit knowledge, definition, 34–36
Team coordination, differing
  understandings of, 261. See also
  Common ground
Ten claims, 7–12, 285–297

Uncertainty, meaning of, 129, 130
Unlearning mental models,
  need for, 272–277
  strategies for, 277–282

Value at Risk (VaR), 81, 238, 239

Zone of indifference, 86, 87, 95
