Index

Page numbers in italics indicate illustrations. Those followed by a t indicate tables; those followed by a c indicate curiosities.

Accelerationist hypothesis, 212
Accounting, generational, 250c
Aggregate demand (AD), 51–75
  automatic stabilizers and, 120–122
  circular-flow diagram of, 52–53, 72–73
  components of, 52, 73
  crowding out and, 119–125
  equilibrium level of, 52, 56
  excess, 53–54
  financing of, 107–108, 109
  income and, 52–53
  inventory changes and, 57, 58
  media illustrations of, 61–63
  national income and, 54–56
  overview of, 52–53
  policy implications of, 59–61
  price levels and, 79–80
  Say’s law and, 71, 72
Aggregate demand (AD) curve, 78, 79–81, 337–339
  derivation of, 98–99
  vs. microeconomic curve, 84c
Aggregate income, 13
Aggregate output, 13
Aggregate supply (AS)
  aggregate demand and, 54–56
  determination of, 53–55
  government spending and, 55–58
  inattention to, 77, 88–89, 91
  in Keynesian theory, 88
Aggregate-supplyaggregate-demand (AS/AD) diagram, 337–339
  advantages of, 84c
  aggregate demand curve in, 79–80, 98–99
  aggregate supply curve in, 78–79
  applications of, 80–81
  Aggregate supply (AS) curve, 78–79, 337, 338
    long-run, 81, 83, 84, 88–89
    short-run, 81, 82–83, 88, 89
Airport economics, 2
Automatic stabilizers, 120–122, 124
Balanced-budget multiplier, 123c
Balance of payments, 257–273
  capital account in, 252, 264–265
  current account in, 261, 262, 264–265
  deficit in, 259
    sterilization policy and, 281–282
    definition of, 258
  exchange rate and, 259, 261c, 276–284. See also Exchange rate
    media illustrations of, 264–265
    nominal interest rates and, 312–315
    official settlements account in, 262t, 263
    principle of comparative advantage and, 271–273
    real interest rates and, 260, 310
    statistical discrepancy in, 262t, 263c
    surplus in, 259
    trade balance in, 261–262
Balance of payments accounts, 260–263
Balance on goods and services, 261–262
Bank(s)
  central. See Federal Reserve System
  as financial intermediaries, 143
  investment, 144
Banking, fractional-reserve, 133–134
Basis point, 183
Bond market. See Money market
Bonds, 144
    coupon, 168–169, 182–183
    crowding out and, 122–123
    current yield of, 184
    discount, 169
    face (par) value of, 168, 182–183
    interest rates and, 333–334
    junk, 144
    long, 183
    maturity dates of, 182–183
    money supply and, 170–171
    open-market operations and, 135
    overview of, 182–185
    present value of, 184
    prices of
        budget deficit and, 251
        interest rates and, 168–170
        stock prices and, 185
        treasury, 183
        budget deficit and, 139, 243, 251
    yield to maturity of, 183–184
        calculation of, 170c, 176, 184
    zero-coupon, 169
Bretton Woods system, 294–295
Budget, full-employment, 246c
Budget deficit
    consumer price index and, 25
    costs and benefits of, 244–245
    cyclical, 124
    definition of, 243
    financing of, 108–109, 197
    Keynesian view of, 60, 243–244
    media illustrations of, 251–252
    reduction of, 248
    sources of, 244
    structural deficit and, 246–249
    trade deficit and, 263, 264, 265
    treasury bonds and, 139, 197–198, 243, 251
Bureau of Economic Analysis (BEA), 14
    publications of, 15c
Bureau of Labor Statistics (BLS)
    publications of, 15c
    unemployment measurement by, 38c
Business cycles
    aggregate-supply/aggregate-demand (AS/AD) diagram
        of, 78–81, 84c, 98–99, 337–339
    inventory changes in, 58
    Phillips curve and, 217
    unemployment and, 40
Capital account, 252, 264–265
Capital inflow
    definition of, 260, 310
    nominal interest rates and, 260, 312–315
    real interest rates and, 260, 310
Capital market, 168
Central bank. *See* Federal Reserve System
Ceteris paribus, 84c, 325, 327
Chern, 106–107
    media illustrations of, 112
Circular flow diagram, 72–73
Claims on the central bank, 134
Classical economic theory, 61, 70–72
Commercial banks, as financial intermediaries, 143
Comparative advantage principle, 271–273
Consumer-generated recession, 61
Consumer price index (CPI), 19–22, 25
    formula for, 26
Consumer spending, multiplier process and, 62
Consumption, disposable income and, 53
Coordination problem, 218
Cost-push inflation, 231
Coupon bond, 168–169, 182–183
CPI. *See* Consumer price index (CPI)
Creative destruction, 106–107
    media illustrations of, 112
Credibility effect, 213
Credit unions, as financial intermediaries, 143
Crow, John, 24c
Crowding out, 119–128
    media illustrations of, 112
Current account, in balance of payments, 261, 262,
    264–265
Curve-shifting economics, 1, 2
Cyclical deficit, 124
Cyclical unemployment, 40

*The Data Game* (Maier), 15c
Debt financing, 144
Debt monetization, 245, 251–252
Deficit. *See* Budget deficit; Structural deficit
